

Parson Drove Parish Plan Refresh Results

Introduction – This report sets out the results from the Parish Plan refresh and the questionnaire which was sent to houses in Parson Drove Parish in October 2013. The results are set out with the number of responses returned and the most common answers to questions where provided. The refresh provides an update to the original Parish Plan in 2004/05. The questionnaire was not exactly the same as that used on the original. This represents the delivery of a number of items from the plan. Commentary will also be provided on the analysis of the results compared to the previous plan.

172 Households replied out of 546 questionnaires issued, with 342 people taking part. This represents a 32% return; which is considered a good response rate, although lower than the original Parish Plan 46%.

- Improvements in conservation area and concerns about building in it
- Don't want any phone masts
