Councillors resolved to make the following comments on the document.

Page 15 Policy CS1 - Spatial Strategy, The Settlement Hierarchy & the Countryside. Small Villages.

In all of the small villages development is too limited; the permitted group of dwellings should be increased from two or three dwellings to no more than four or five dwellings to ensure that the small villages are sustainable.

Pages 18 & 19 Policy CS2 - Growth & Housing

Town and Parish Councils who have obtained the Quality Parish & Town Council status should have more influence on planning decisions.

Page 21 Policy CS3 - Meeting Housing Need

The Council supports the need for affordable housing but considers that the financial contributions to the District Council being suggested are excessive and too restrictive and will therefore deter and discourage housing development. Councillors were particularly concerned that the level of financial contribution suggested will deter private self build dwellings and small builders developing single dwellings on infill sites.

Councillors suggested that the level of financial contributions to the District Council should be reduced as follows.

a) No financial contribution for 1 single dwelling. A 5% financial contribution towards affordable homes for 2 to 9 dwellings.

b) 10% of the dwellings as affordable homes on sites for 10 to 99 dwellings.

c) 12% of the dwellings as affordable homes on sites over 100 dwellings.

The Council considers that affordable housing in rural locations should be allocated on the basis that those with a local connection should be offered housing first. This policy should follow the same criteria as that for Exception Sites for Affordable Housing. This would help to ensure that rural locations support the housing needs of local residents and not force people to move out of the area in which they have lived the majority of their lives.

Page 22 - Suitable new Gypsy & Traveller sites

b) New sites should be located within major developed settlements and not within reasonable travelling distance of a settlement. This will ensure that the appropriate infrastructure and services are available to support the needs of this group.

**Page 33 Policy CS6 - Wisbech
West Wisbech**

Improvements to vehicular movement to address the congestion on the local highway network is already urgently required and needs to be in place before this area is developed further.

The Wisbech Port Area and surrounding highway network is also already very congested and improvements are required to cope with future new development.

Strong support should be given to proposals for the reintroduction of the March - Wisbech railway as another means of public transport between the two Towns.

Page 47 Policy CS10 - Rural Areas Development Policy

Section A

An additional criteria should be incorporated in this section acknowledging that greater notice will be taken on the views of the Parish/Town Councils, Fenland District Ward Councillors and adopted Parish Plans.

The continuation of a defined Development Area Boundary in the rural areas should still be retained as this provides clarity on permitted development in the rural areas.

Page 50 Policy CS11 - Supporting & managing the Impact of a Growing District.

b) Developer Contribution

The existing Section 106 Policy with contribution levels should be reviewed and amended in the interim until the Community Infrastructure Levy regulations are in force so that each development contributes towards the infrastructure.

11/203. Accounts & Finance.

a) Councillors resolved to approve the following Invoices for payment:-

5. Close off the B1166, nearest to the War Memorial side of the traffic island, to traffic wishing to enter the B1187 from Main Road.
